Late Shankarlal Shivilal Talati

Late Mangalaben Shankarlal Talati

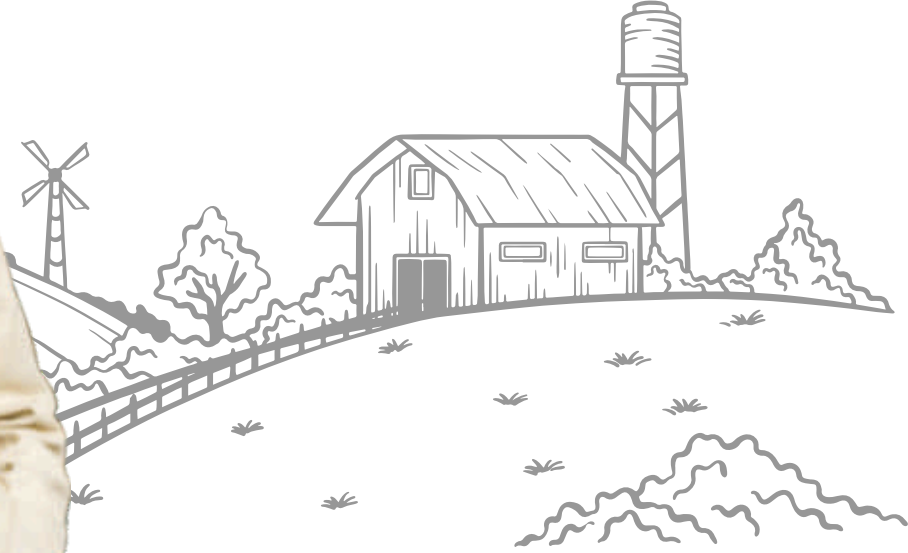

**Our company achieves success
only with the blessings of our
elders. May your blessings always
be upon us in the future.**

Our promise to the farming community is that we have always been, are and will continue to work in the interest of farmers.

Parshottam Das Shankarlal Talati

यदा यदा हि धर्मस्य ग्लानिर्भवति भारत।
अभ्युत्थानमधर्मस्य तदात्मानं सृजाम्यहम्॥

We categorize each farmer well in attractive and simple packaging. We are committed to delivering cleanly processed seeds.

Kavan Parshottamdas Talati

We will always deliver higher yielding varieties to farmers in the seed sector and always fulfill our promise.

Ritul Parshottamdas Talati

All Dealers and farmers ..

Vande Mataram,

We are grateful that you have been associated with us in the seed world for many years with love and trust

It is a matter of great joy to inform that with the blessings and cooperation of all our dealers and farmers, in the world of seeds, the saying — **॥ सुबीजम सुक्षेत्र जायते सम्पद्यते ॥** (meaning: when good seeds are sown in good soil, happiness and prosperity increase) — has been realized. Believing in this principle, New Dantiwada Seeds Corporation has been working tirelessly. For this, New Dantiwada Seeds Corporation, Kapadwanj, along with the entire Kapadwanj family, expresses heartfelt gratitude to its millions of beloved farmers and dealers and hopes to continue receiving such unwavering support forever. Furthermore, it is to be mentioned that all the seeds produced by the company are of high quality, well-graded, and systematically processed, delivered to farmers and dealers only after full compliance with all government regulations. The company produces and markets both notified seed varieties approved by Agricultural Universities and research (improved) seed varieties of various crops, all under the direct supervision of technical experts. The company will always remain committed to delivering high-quality seeds with attractive packaging to every dealer and farmer. To strengthen its dealer network, the company will work firmly on a “one place – one dealer policy.” In necessary circumstances, if mutual coordination is maintained between dealers of the same area, then in such cases, the company will provide every possible cooperation. The company will always prioritize the interest of farmers first in all the seeds it produces. Currently, the company produces and supplies the following seeds to all dealers and farmers: Wheat seeds, Paddy (Rice) seeds, Sesame seeds, Black gram (Urad) seeds, Green gram (Moong) seeds, Soybean seeds, Cumin seeds, Mustard seeds, Groundnut seeds, Pigeon pea (Tuvar) seeds, Pearl millet (Bajra) seeds, Fodder Bajara (Pearl Millet), Hybrid Sorghum Sudan Grass (SSG), Cluster bean (Guar) seeds, Vegetable Guar seeds, Cowpea seeds, and Chickpea seeds, which we are placing on record for your kind notice. We assure you that our firm’s support and cooperation will always remain positive towards you. In the continuous growth journey of the company, we wholeheartedly bow to the positive and selfless cooperation of all staff members, workers, and seed-producing farmers engaged in seed plotting, and we duly acknowledge their golden contribution in the company’s development journey.

Years of trust, pure quality, more production, excellent service is what New Dantiwada Seeds Corporation is all about.

Crop	Variety	Class	Weight per Bag
Cowpea	Mangala	Research	500 Gram

Cumin

Crop	Variety	Class	Weight per Bag
Cumin	GC-4	Certified	2 Kg

Subject: Why not return the goods?

With respect and regards, I would like to inform you that you will be successful. I would also like to inform you that for the last many years there have been a lot of negative results regarding the return of goods. Therefore, after a very in-depth study, the company is writing this letter to warn its business friends about the disadvantages of returning goods."

Disadvantages of returning goods :-

If a quantity that the company does not have in sufficient quantity is returned by a trading partner, other trading partners interested in the same quantity in the market will not be treated fairly.

Returning the goods does not benefit the merchant or the company, but only a third party, i.e. the transport department and other departments,

The quantity that is returned is damaged in its outer packing (master bag) and becomes unusable.

Many times, when goods are returned by the transport department, the seeds are severely damaged and the hooks used to lift them easily cause a lot of damage to the jewelry, after which the quantity becomes useless.

The returned goods have to be stored under fumigation, retested, and repacked, and the seed stock of many crops becomes inactive in the next season due to technical reasons, causing the company to face financial losses.

Returning goods causes a huge financial loss to the company.

In the end, returning the goods is a huge waste of time. We understand that our business is driven by nature and it is very difficult to predict, but if we think as a positive human being, it is very easy to be aware of this and bring about improvement and the company stands with us with a strong approach in this regard.

A question arises in the minds of many business friends that if we order the required quantity and after that is completed, if the remaining quantity is very less, will the company send it? Yes, the company will definitely send it and the company will provide full cooperation in this matter in a positive manner.

Finally, we pray to God that through you and ours you will make great progress in the business world and the company will provide full cooperation to be a partner in your development and your development is our development and finally, Jai Shri Krishna to all of us....

.... Support Expected....
